

2, 5, 10 Way Connection Boxes

Eland Product Group ATA

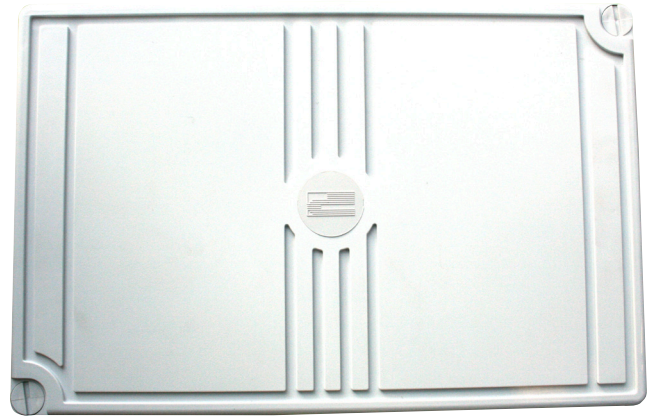

Application

2 Way

The ATA2WAY Connection Box is a wall-mounted 20 pair voice connection box manufactured in mid grey flame retardant PVC (Polyvinyl Chloride). It is primarily used for connection of CW1308 voice cabling. It can have up to 2 x 10 pair IDC disconnection strips and designation strips.

Features and Benefits

- Cables access is via lid knockout features
- Internal cable management features incorporating integral jumper rings and a 10 way earth bar
- Two captive screws ensure the lid is kept firmly in place.
- Mark up field to underside of lid for labelling and identification

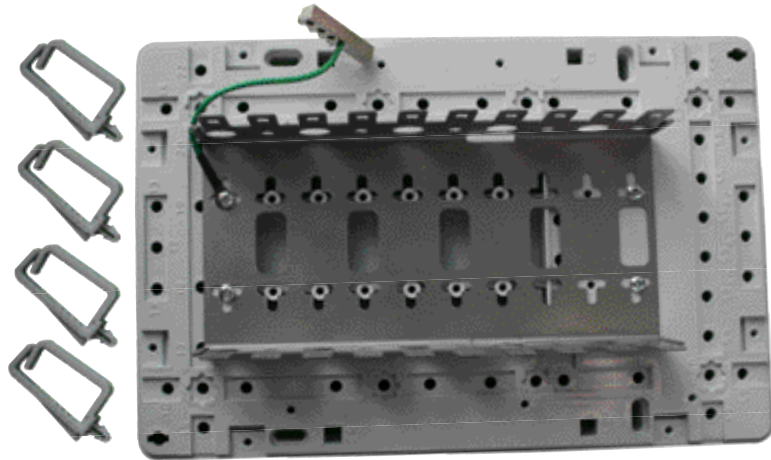

5 Way

The ATA5WAY Connection Box is a wall-mounted 50 pair voice connection box manufactured in mid grey flame retardant PVC (Polyvinyl Chloride). It is primarily used for connection of CW1308 voice cabling. It can have up to 5 x 10 pair IDC disconnection strips and designation strips.

Features and Benefits

- Cables access is via side panel tear-out features.
- Internal cable management via 4 off 37B jumper rings
- The earth bar assembly provides a common earthing point
- Side and end panels can be removed to allow side-by-side mounting
- Captive quarter turn locking posts ensure that the lid can be easily removed and locked.

10 Way

The ATA10WAY Connection Box is a wall-mounted 100 pair voice connection box manufactured in mid grey flame retardant PVC (Polyvinyl Chloride). It is primarily used for connection of CW1308 voice cabling. It can have up to 10 x 10 pair IDC disconnection strips and designation strips.

Features and Benefits

- Cables access is via side panel tear out features
- Internal cable management via 4 off 37B jumper rings
- The earth bar assembly provides a common earthing point
- Side and end panels can be removed to allow side-by-side mounting
- Captive quarter turn locking posts ensure that the lid can be easily removed and locked
