

50 Port 1U Voice Panel

Eland Product Group **A8D**

Application

Voice panels are an easy way to bring voice/PBX circuits into structured cabling. This voice panel is 19" wide so it will fit in a standard data cabinet. It also has an integral rear cable mounting tray. It can be wired with up to 3 pairs and has IDC contacts suitable for IDC tooling. This is a high density panel as there are 50 ports in 1U space.
