

Low Profile UTP Modules – LSA Compatible

Eland Product Group **A8D**

Application

These modules are used for either data or voice networks in both domestic and commercial properties. They are shuttered to prevent dust entering the module, and allow for less bend radius in the back box to protect the cable. Termination can be made using LSA compatible tooling.

Technical Data

Colour

White

Supplied with

Strain relief cable tie for cable protection.

Marking

Cat 5E or Cat 6
